

Dear Colleague,

**Biosystems International** is proud to be a corporate sponsor of Cambridge Healthtech Institute's Biomarker World Congress, being held May 15-17,,2007 in Philadelphia, PA. Over the last three years, Cambridge Healthtech Institute's Biomarker Series has become the premier producer of cutting-edge meetings focusing on biomarker discovery and implementation.

The Biomarker World Congress offers a comprehensive two-day program, covering all aspects of biomarker discovery, translation, and implementation in the clinic. Now in its third year, the Biomarker World Congress will feature the best examples and case studies in all areas of biomarker research spanning the pharmaceutical and diagnostic pipeline, including safety and efficacy assessment in drug discovery, biomarker translation from preclinical to clinical studies, and biomarker applications in clinical trials, including patient selection, monitoring clinical efficacy and safety, and clinical pharmacology.

**BioSystems International** will be featuring its proprietary **mAb based biomarker discovery and validation platform** during the Solutions Showcase I: **"Biomarkers in Drug Discovery"** on Wednesday, May 16 at 11:30 am

Our platform combines unique features such as:

- Discovery- HTS with disease specific mAb libraries
- Up to 10 000 human plasma proteome specific mAb / library
- Proprietary plasma proteome normalization technology
- Discovery and first level validation of biomarkers in one step (one year)
- Outcome: biomarker IDs, reagents (mAb) and clinical assay prototype

For complete conference information, visit the web site: <http://www.biomarkerworldcongress.com/>. To learn more on BioSystems International's technology, visit our web site ([www.biosys-intl.com](http://www.biosys-intl.com)) or our exhibition booth (# 11) during the meeting

Warmest regards,

François Liebaert  
Vice President Business Development & Finances
